PROFILE

Furniture Designer and 3D Visualizer with a background in architecture. I connect product design with its presentation: from the first concept and 3D model to the render that shows the piece in a catalog. I pay attention to proportions, upholstery details and realistic materials. I know production from the inside: 2+ years in-house, including at a furniture factory.

EXPERIENCE

CG Artist / 3D Designer

FRANKOF, furniture factory, May 2025 – July 2026

- Took part in developing new furniture products: created chair concepts and 3D models.
- Modeled furniture from measurements and 3D scan data.
- Created photorealistic product and interior visualizations of furniture for marketing and sales materials.
- Designed showroom interiors for different furniture collections: zoning, furniture layouts and planograms, technical drawings.
- Prepared documentation for built-in furniture and cabinetry; consulted remotely during furniture installation.

Interior Designer / 3D Visualizer

MBA Development Group, remote, October 2024 – May 2025

- Modeled furniture, custom interior features and decorative elements.
- Selected furniture, materials and finishes for residential and commercial interiors.
- Produced photorealistic interior visualizations in 3ds Max and Corona Renderer.

RESULTS

- Took part in the factory's new product development with my own chair concepts and 3D models.
- My product renders were used in the catalog, social media, boards and on the website.
- From one scene the catalog got a product's whole fabric range, with the same camera and light in every variant.
- Showrooms for the factory's collections were built to my layouts and planograms.

SKILLS

Chair concepts
3D furniture modeling
Modeling from measurements
3D scan data
Built-in furniture and cabinetry
Upholstery materials
Product renders
3ds Max
Corona Renderer
Adobe Photoshop
Substance 3D Sampler
Topaz DeNoise AI

EDUCATION

Bachelor of Architecture
Ivano-Frankivsk National Technical University of Oil and Gas
2022 – 2026

LANGUAGES

Ukrainian (native), English (B1), Polish (B1)

KEYWORDS

Furniture design, product design, upholstered furniture, chair design, 3D modeling, modeling from measurements, 3D scanning, product rendering, material variations, catalog CGI, built-in furniture, cabinetry, showroom planning, 3ds Max, Corona Renderer
