oleksandr-riznyk.vercel.app/3d-visualizer

3D Visualizer with a background in architecture, focused on interiors and furniture. I care about what makes an image look like a photograph: believable materials, natural light and a considered composition. I can also turn still renders into cinematic camera motion. 2+ years of full-time experience.

EXPERIENCE

CG Artist / 3D Designer

FRANKOF, furniture factory · May 2025 — July 2026

— Created photorealistic interior and product visualizations of furniture for marketing and sales materials.
— Built 3D models of furniture from measurements and 3D scan data.
— Set up interior scenes, materials and lighting to present furniture collections.

Interior Designer / 3D Visualizer

MBA Development Group, remote · October 2024 — May 2025

— Produced photorealistic visualizations of residential and commercial interiors with a focus on materials, lighting, composition and atmosphere.
— Built detailed 3D scenes in 3ds Max and Corona Renderer from architectural and technical drawings.
— Modeled furniture, architectural elements and custom interior features.

SKILLS

3ds Max · Corona Renderer · Adobe Photoshop · Substance 3D Sampler · Topaz DeNoise AI · Archicad · 3D modeling · Materials and texturing · Lighting · Composition · Post-production · Cinematic motion

EDUCATION

Bachelor of Architecture

Ivano-Frankivsk National Technical University of Oil and Gas
2022 — 2026

LANGUAGES

Ukrainian (native), English (B1), Polish (B1)

01 / 04

INTERIOR FOR A VELVET BED AND NIGHTSTAND

An upholstered bed and nightstand in a calm bedroom with timber panels and a marble band. One scene in two velvet colorways, plus the nightstand shot in five fabrics.

MY PART

Bed modeling, scene, materials, lighting, rendering, cinematic camera motion. The nightstand model was supplied.

MATERIALS

Upholstery: velvet (terracotta, gold, chocolate), ochre chenille, sand bouclé; dark oak wall panels with backlit stone inserts, marble band and marble floor tiles, linen bedding, wool rug.

LIGHTING

Soft daylight through sheer curtains, warm LED lines between the panels, two pendant lamps over the bed.

SOFTWARE

3ds Max: modeling and scene. Corona Renderer: materials, light, render. Photoshop: post-production. Cinematic camera motion from the stills.

Camera animations are on the site · Full project on the site ↗

KITCHEN INTERIOR FOR BAR STOOLS

A bar stool presented in a kitchen I designed for it: travertine island, timber fronts and hidden linear light. The same shot carries five upholstery options.

MY PART

Kitchen interior concept and modeling, materials, lighting, rendering, cinematic camera motion. The stool model was supplied.

MATERIALS

Travertine island, wood-veneer fronts, concrete-look backsplash, oak floor, black metal legs. Upholstery: velvet, bouclé, faux fur, jacquard.

LIGHTING

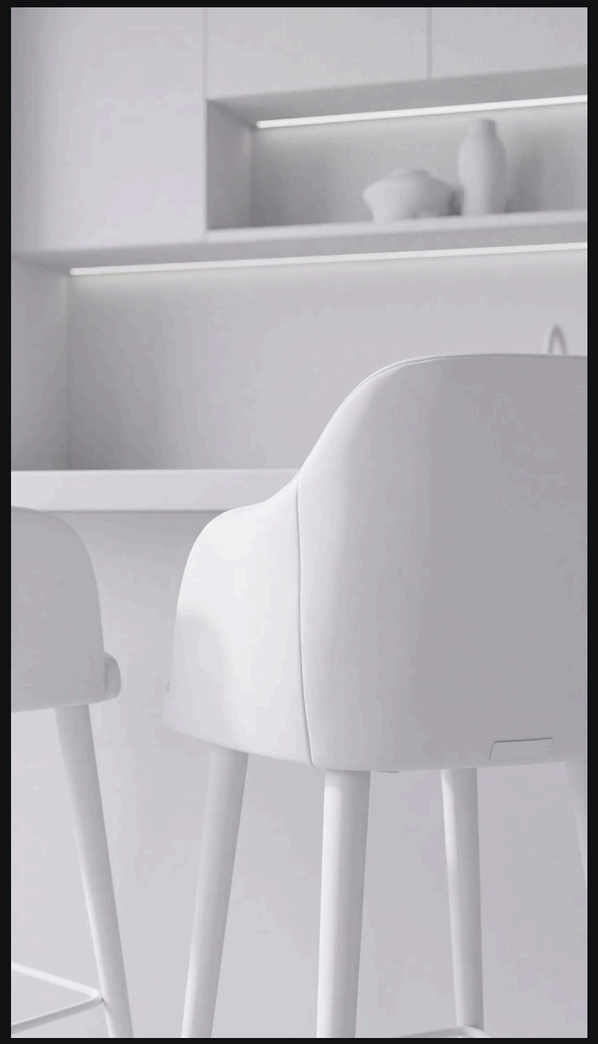

Side daylight through blinds and a warm LED line under the wall cabinets.

SOFTWARE

3ds Max: kitchen modeling and scene. Corona Renderer: materials, light, render. Photoshop: post-production. Cinematic camera motion from the stills.

LIVING ROOM WITH A GARDEN VIEW

A living room opening onto a garden: suede-like upholstery, a stone coffee table, paper lanterns and warm evening light.

MY PART

Interior scene, materials, lighting, rendering, cinematic camera motion. The furniture models were supplied.

MATERIALS

Suede-like upholstery, stone coffee table, woven jute rug, dark wood wall panels, paper lantern pendants, concrete floor.

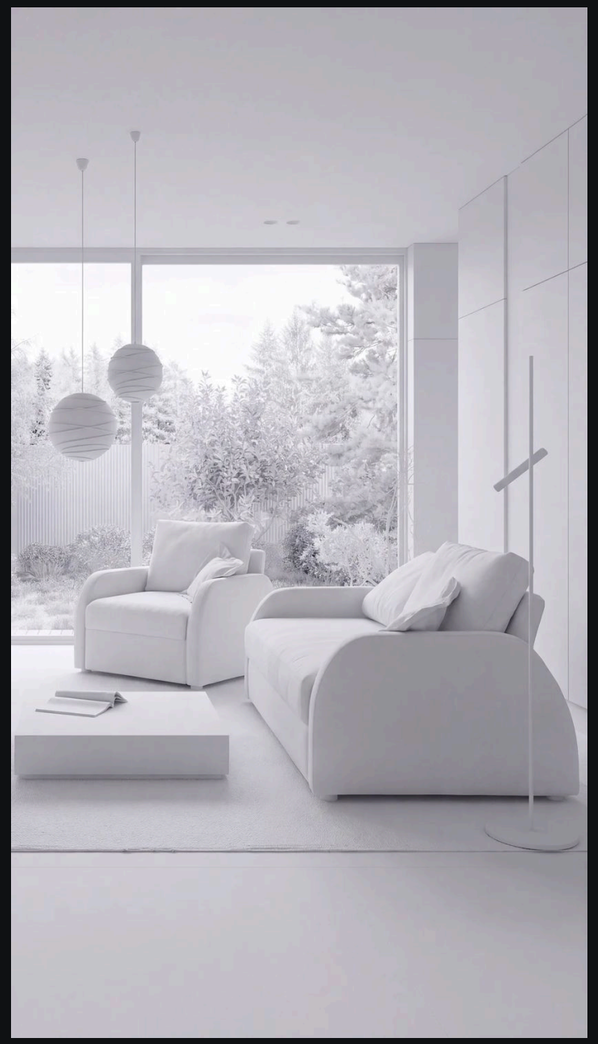

LIGHTING

Daylight from a floor-to-ceiling window balanced with warm pendant light.

SOFTWARE

3ds Max: scene. Corona Renderer: materials, light, render. Photoshop: post-production. Cinematic camera motion from the stills.

COTTAGE

An exterior visualization of a minimalist house clad in dark timber, set in a meadow by a natural pond.

MY PART

Concept and visualization: modeling, materials, landscape, lighting, rendering, cinematic camera motion.

MATERIALS

Dark timber cladding, black glazing, timber deck, natural pond, meadow grass.

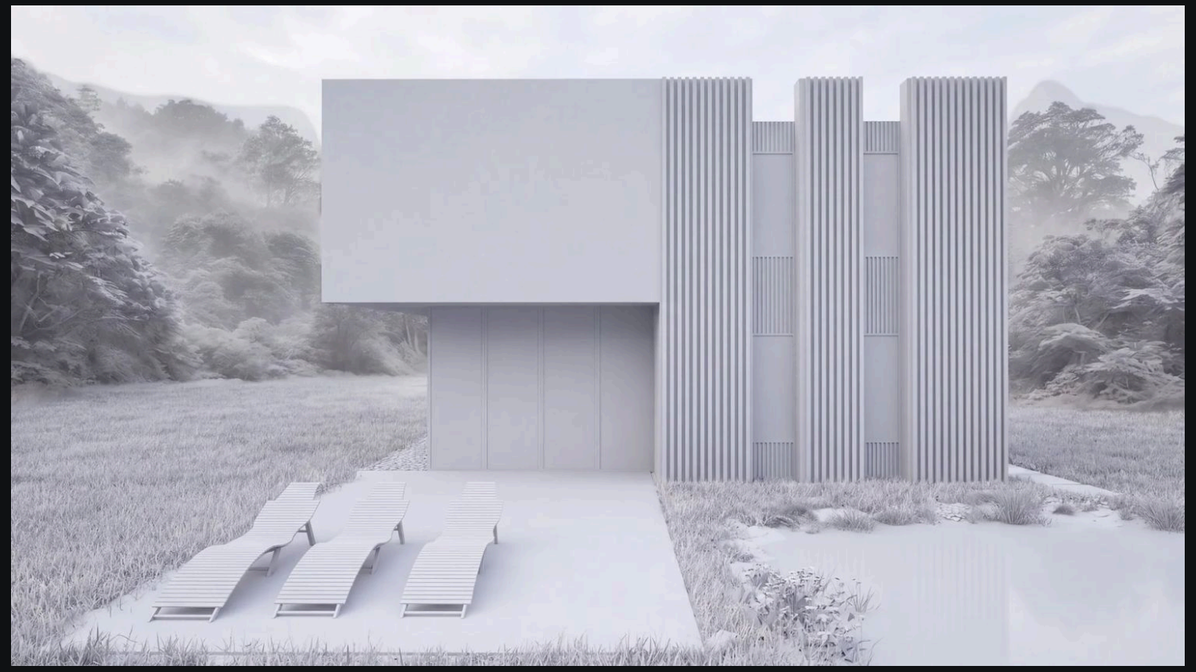

LIGHTING

Low morning sun, mist in the trees, soft sky light.

SOFTWARE

3ds Max: modeling and scene. Corona Renderer: materials, light, render. Photoshop: post-production.
